

gCore, The Game Server

Online gaming and gambling service providers compete in a crowded industry with an enormous business potential. Being a leading service provider requires not just first class gaming content but also highly capable IT infrastructure, flexible software, back-end software systems and constant alignment with worldwide regulations.

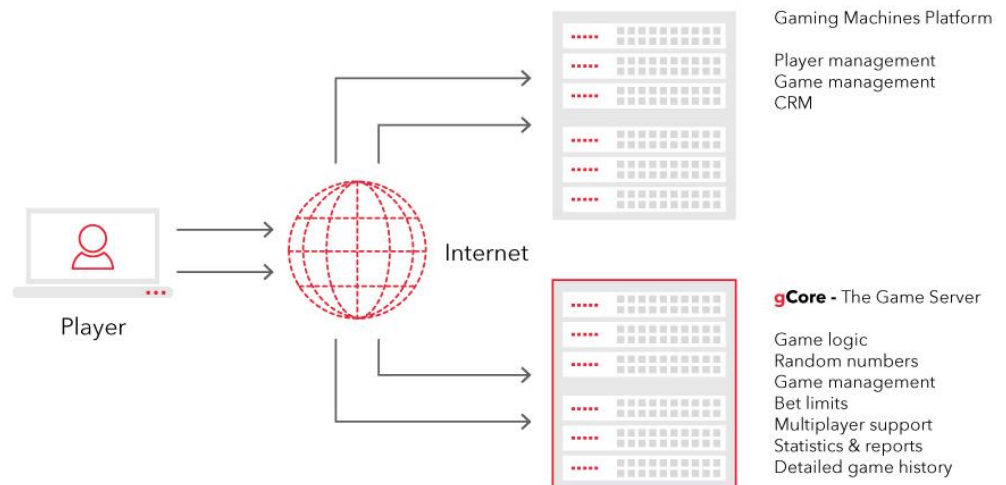

Comtrade Gaming [gCore, The Game Server](#) allows operators with third party or white label solutions a way of making custom changes faster, integrate new content quicker and gain more control over their player's experience.

The benefits of running your own gCore game server are endless. For example, you can control many more aspects of game play whilst retaining numerous features from your partner platform.

- Ability to use third party development teams for game and application development
- Full source code and documentation as if developed in house
- Quicker route to market for a number of games and optimization for fast game deployment
- Reduction in cost and spend for betting and gaming infrastructures
- Increased variety of games for your players
- Open game API on both server and client allowing faster games development
- Full control of the game server which means sensitive player data is in your hands

GCORE HIGHLIGHTS

- Quick route to market
- Increased competitiveness
- More control over player experience
